2023-2024 TRAINEE TRACK PROGRAM DETAILS

The Patricia A. Tietjen, MD Teaching Academy is excited to launch our first cohort of the Trainee Track in fall 2023. This latest program of the Teaching Academy will bring together senior residents and fellows from various programs across Nuvance Health, cohort-style, in a series of curated learning experiences designed to strengthen pedagogical skills and inspire a professional path in clinical education. All curricular content for the Trainee Track is aligned with the ACGME [Clinical Educator Milestones](#).

Learning sessions are blended by design; the majority of sessions will be virtual with several in-person "marathon meetings" to forge closer connections and build a true Community of Practice. To be part of the Trainee Track, any interested senior resident or fellow should contact their Program Director and share this information. Trainees must be nominated by their Program Directors in order to be considered for membership in the Trainee Track. PDs may nominate multiple trainees per program; nomination indicates the PD's commitment to resolve scheduling conflicts to allow trainees to attend all sessions.
